

# EID Race Reader

electronic tag reading for your beef farm

Automatically reads electronic ear tags in the yard environment.

## Automatically Identifies Animals

Instant recognition of individual animals  
Easy identification of top and poor performers  
React to individual animal requirements

## Accurate Every Time

Reduces tag reading errors  
No manual input errors  
Records are correct

## Fast

Animals spend more time on pasture  
Less operator time in yards  
Animals are quieter, less damage to yards

## Labour Saving

No one needed to read ear tags  
Lower staff costs  
Staff freed up for other activities

## Safer

No contact with animals required to get ID  
Decreased chance of injury to staff or animals  
Less animal and operator stress, so both are better behaved

- Connects directly to EID-enabled weigh scale indicators!
- Fits in existing weighing environments without any modifications!
- Reads both FDX-B and HDX tag technologies!
